EDUCATION

B.Tech in Computer Science & Engineering (Networking)

2023 – 2027

SRM Institute of Science and Technology, Kattankulathur

CGPA: 8.92 / 10

- Relevant Coursework: Data Structures & Algorithms, Computer Networks, Operating Systems, Database Management Systems, Object-Oriented Programming, Software Engineering

EXPERIENCE

iOS Developer Intern

Mar 2026

Infosys

Mysore, India

- Built mobile application features using **Swift**; developed and optimized UI components following **MVVM** architecture patterns and Apple Human Interface Guidelines.
- Debugged and resolved UI rendering issues, improving app responsiveness; gained exposure to **Xcode Instruments** for profiling and performance bottleneck identification.
- Participated in code reviews, sprint planning, and agile ceremonies within a structured enterprise delivery team.

Frontend Developer Intern

Oct 2025 – Mar 2026

Directorate of Entrepreneurship and Innovation (DEI), SRM IST

Chennai, India

- Engineered **3 production web portals** (SRM DEI Website, BIRAC Portal, CIAP Portal) using **Next.js, React, Node.js, and MongoDB**, currently serving active institutional users.
- Implemented **server-side rendering (SSR)** and dynamic routing with Next.js App Router, reducing TTFB and improving Lighthouse performance scores for public-facing pages.
- Designed RESTful API contracts, integrated third-party data sources, and enforced consistent component architecture across all three portals.
- Collaborated closely with faculty stakeholders to iterate on UX and ensure accessibility compliance for institutional deployment.

Full-Stack Intern

May 2024 – Aug 2024

Jainemo Private Limited (Remote)

- Delivered **MERN stack** curriculum to **5,000+ learners**; produced structured technical content covering full-stack architecture, REST APIs, asynchronous JavaScript, and state management.
- Created reusable code templates and problem sets adopted across multiple course modules, reducing content production time.

PROJECTS

Mitra-MEET — Real-Time Communication Platform

React.js, Node.js, WebRTC, Socket.IO

- Architected a peer-to-peer video communication platform supporting **100+ concurrent users** with sub-200ms latency using **WebRTC** for media negotiation and **Socket.IO** for signaling.
- Implemented room-based session management with dynamic ICE candidate handling, STUN/TURN server integration, and graceful degradation on network packet loss.
- Designed a stateless Node.js signaling server with event-driven architecture, ensuring horizontal scalability.

Lazarus — Fintech Data Visualization Platform

Node.js, MongoDB, React.js

- Built interactive dashboards for real-time financial data aggregation and visualization using **charting libraries** and MongoDB aggregation pipelines.
- Optimized complex MongoDB queries with compound indexing and projection, significantly reducing read latency on large financial datasets.
- Implemented role-based access control (RBAC) and JWT-based authentication to secure sensitive financial data endpoints.

SKILLS

- Languages:** JavaScript, TypeScript, Swift, Python, C++
- Web:** React.js, Next.js, Node.js, Bun, HTML5, CSS3, REST APIs, WebRTC, Socket.IO, JWT
- Mobile:** Swift, UIKit, MVC/MVVM, App Lifecycle, Xcode (iOS)
- Databases & Tools:** MongoDB, Git, GitHub, Figma, Postman, Selenium
- Concepts:** Data Structures & Algorithms, System Design (basics), Agile/Scrum, OOP, SSR/SSG

CERTIFICATIONS & RECOGNITION

- MongoDB Associate Developer** — MongoDB, Apr 2026 | Credential: 5cb994bf-78c7-4b82-9d8f-fe02ff334414
- iOS Student Developer Program** — Selected by **Apple & Infosys** for a competitive industry-academia initiative in professional iOS engineering practices.
- Teaching Associate** — CherryNetwork, SRMIST: Mentored peers in core CS concepts and development practices as part of a community technical education program.
